FY 17 Funding Strategy: Funding the Best Science

• Increase flexibility for discretionary funding
  • No fixed pay line for investigator-initiated R01, R21, R03, R13 and R15
  • Using branch priorities, portfolio balance, and availability of funds
  • In practice for FY 17

• Be more strategic about our investments:
  • Mechanisms
  • Acceptance of large grants
  • Participation in FOAs
  • Refining referral guidelines

Progress in Clinical Trial Reforms
Concerns about NIH Clinical Trials

• Large investment, $3 billion/year
• Variable quality of trial design
• Incomplete registration and reporting of trial results
• Inconsistent oversight and monitoring
• Inability to assess across IC’s
Reforms over the clinical trial lifecycle

NIH Stewardship Reforms:
- Good Clinical Practice Training
- Clinical Trial RFA/FOA
- Single IRB Policy
- Protocol Template
- ClinicalTrials.gov Registration
- ClinicalTrials.gov Results Submission

FOA Planning

• Background
  
  • As of January 25, 2018:
    
    • Applications with clinical trials will no longer be permitted to “parent” NIH FOAs
    
    • All FOAs have to specify whether trials are accepted or not

• NICHD efforts underway
  
  • Identify a “strategy” for receiving investigator-initiated applications involving clinical trials
  
  • Examine all existing FOAs to determine whether they accept clinical trials or not

• Timeline
  
  • Target date: New or revised FOAs released by November 25, 2017
