

**Department of Health and Human Services (HHS)**  
**National Institutes of Health (NIH)**  
***Eunice Kennedy Shriver* National Institute of Child  
Health and Human Development (NICHD)**

**PEDIATRIC STAFF CLINICIAN:**

**Clinical Research Support**  
**Genetics, Neurology, Endocrinology**

Applications are being accepted for highly motivated individuals to work collaboratively with interdisciplinary research teams to facilitate clinical research, including U.S. Food and Drug Administration (FDA)-regulated drug trials. Areas of research include rare genetic diseases as well as pediatric, adult and reproductive endocrinology.

The successful candidate will have an M.D. (or equivalent degree), be licensed to practice medicine in the United States, and be eligible to be credentialed for patient care by the NIH Clinical Center. The ideal candidate will be board-certified in pediatrics with subspecialty training in Clinical Genetics, Neurology, or Endocrinology. This candidate will also be an excellent physician who has a strong interest and desire to conduct high-quality clinical research. Successful candidates will function in concert with protocol coordinators, research nurses, and principal investigators to support ongoing clinical research projects and will be integrally involved in the development of new clinical research protocols. Successful candidates will be involved with data collection, interpretation, and publication.

Salary is commensurate with training and relevant research experience. Applicants should submit their curriculum vitae and a short description of future research interests, and should request that three reference letters be sent to Dr. Meg Keil via email ([keilm@mail.nih.gov](mailto:keilm@mail.nih.gov)). Applications will be reviewed upon receipt and positions will be filled on a rolling basis.

HHS, NIH, and NICHD are dedicated to building a diverse community  
in their training and employment programs.

HHS, NIH, and NICHD are Equal Opportunity Employers.
